

<Archery Experience: Making a Korean Recurve Bow>

****Here is a Youtube tutorial about assembling this kit :** <https://www.youtube.com/watch?v=HS0Kv6H9GYw&t=97s>

The kit includes:

Suction cups
black yarn
Chuljeonpi (leather)
Chiljidanjang (paper decoration for the two ends of the bow)
Stickers for decoration
Nylon threads
Bow string
Wood arrows
Wooden bow

Also you will need:

Scissors
Glue
Glue gun
Wet cloth
Lighter

*** Please do not peel off the double-sided tapes attached to the center of the wooden bow, Chuljeonpi, Chiljidanjang in advance. Please remove them following the order given in this instruction.*

Instructions:

1. Adding thread wraps to a wooden bow

- 1) Peel off the double-sided tape attached to the wooden bow.
- 2) Start with wrapping the bow using the nylon thread. Carefully wind each new thread next to the one before it so as to not to overlap. (It's good to leave some space at the end.)
- 3) Using the same method, wrap the opposite side as well.

2. Wrapping Chuljeonpi (leather)

: Peel off the double-sided tape attached to Chuljeonpi (leather).

3. Wrapping black yarn to the center of the wooden bow

- 1) Peel off the double-sided tape attached to the center of the wooden bow (outside, inside)kk
- 2) Wrap black yarn around the bow as shown in the Youtube tutorial.
3. Once the wrapping is done, cut the yarn, melt the end using a lighter so it adheres to the bow.

*** Be careful when using the lighter.*

4. Decorating the two ends of the bow using Chiljidanjang

- 1) Put Chiljidanjang on the two ends of the bow.
- 2) Cut off the excess paper sticking out from the ends with scissors
- 3) Press firmly to make sure that it stays in place.

5. Decorating the wooden bow with stickers and Taegeukgi (Korean flags)

- 1) Remove the sticker's clear top sheet.
- 2) Carefully place it face down on the bow.
- 3) Use a wet cloth to moisten the sticker.
- 4) Once it's moistened enough, peel off the top carefully
- 5) Make sure that the sticker stays on.
- 6) Attach the Taegeukgi (Korean flags) wherever you would like.

6. Stringing the bow

- 1) String a bow string
- 2) Make sure that the string is installed securely and the wooden bow is balanced.

7. Making wood arrows

: Press the center of the suction cup firmly onto the wood arrow shaft.

8. All done!
